

Lofi Diagram Presentation

- Need to fix governance - we thought it needed to be accessible to the public, that was incorrect
 - Fix site map and lofi so that governance is only on the members only site
- Forgot to add home tab and calendar tab on the navigation header of every page
- Customers are interested in having a comments section for the music page
 - Only having admins able to upload audio files may create a bottleneck
 - Having a comments section for each music piece would eliminate this
- Liked the search function on the music page
- Music upload page - Natalia wasn't there, but the members that were there agree that clicking the upload button only once was better than uploading 11 separate files one at a time
- Change the wording from 'phone number' to 'cell phone number' and to make it clear that the notifications are via text and thus require a cell phone
